Dynamic Active Global Equity Income ETF

Dynamic Active Global Equity Income ETF aims to provide investors with access to a diversified portfolio of quality companies from around the globe. The ETF will invest primarily in dividend or distribution paying securities and offer a stable monthly income stream.

- With thousands of listed names across global markets, the opportunity set is simply better to find high-quality investible businesses. The use of an active management style ensures a better balance between investments in cyclical, defensive and secular growth companies.
- Going global means greater diversification whether that's by country, by economy, by central bank or by currency. This diversification can help lead to lower volatility over the long term.
- Our skilled team, made up of 22 investment professionals, is well regarded for their experienced and conservative approach in managing income-oriented equities. Using a disciplined investment process, QUARP® (quality at a reasonable price), they work closely to identify opportunities in the marketplace.
- A fixed monthly distribution provides stable income that offers an initial yield of 3.0%¹.

¹ The yield is calculated based on a fixed, but not guaranteed, monthly distribution \$0.05 cents/unit and a net asset value per share (NAVPS) of \$20.00 as of inception date. Monthly distribution yields may fluctuate as the month end NAVPS changes. A Fund's distribution yield should not be confused with its performance or rate of return.

² Portfolio attribute targets shown are guidelines only. Actual allocations and holdings may vary due to changes in market conditions and other factors.

³ Distribution Reinvestment Plan ("DRIP") is available, allowing investors to reinvest cash distributions, provided that the Advisor's brokerage firm supports participation in the DRIP. Cash distributions are declared at the sole discretion of the manager and are not guaranteed.
