### How risky is it?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

### Risk rating

1832 Asset Management L.P. has rated this Fund's risk to be **medium to high**.

This rating considers how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the Risk section of the Fund's simplified prospectus.

### No guarantees

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

### How has the Fund performed?

This section tells you how the Series FT shares of the Fund have performed since it was created. Returns are after expenses have been deducted. These expenses reduce the Fund's returns.

**Who is this Fund for?**

**Investors who are ...**

- seeking the capital growth potential of investments in equities of businesses around the world;
- able to accept some variability of returns and are investing for the long term.

Series FT shares are intended for investors participating in an eligible fee-based or wrap program with their representative's firm, and seeking stable monthly distributions.

**!** Do not invest in this Fund if you cannot accept the volatility of equity markets.

**A word about tax**

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

A switch to a different fund within the same mutual fund corporation or a reclassification between series of the same fund that employ different hedging strategies will result in a disposition for tax purposes and accordingly, you will realize a capital gain or capital loss.

**How much does it cost?**

The following tables show the fees and expenses you could pay to buy, own and sell Series FT shares of the Fund. The fees and expenses, including any commissions, can vary among series of the Fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

The annual management fee is 1.00% and the fixed administration fee is 0.11% of the series' value.
